Personal Profile

I am a motivated, creative and solutions-focused individual with strong attention to detail, a logical approach to problem-solving and a genuine enthusiasm for learning.

My interest in technology began at 11, when I enjoyed creating and customising websites using Piczo and Bebo, experimenting with colour codes, layouts and website features. This developed into a passion for digital design and understanding how websites work.

Through establishing and managing my own e-commerce businesses, I have gained practical experience in website management, Shopify theme customisation, digital platforms and independently researching technical solutions.

I have discovered that my real passion lies behind the scenes, developing ideas, improving systems and solving problems. I am now eager to build a long-term career in software development through structured training, hands-on experience and learning from experienced developers.

Key Skills

- Digital literacy: Experienced in e-commerce website management, Shopify theme customisation, digital platforms and business software.
- Problem-solving: Confident identifying technical issues, researching solutions and implementing improvements.
- Independent learning: Proactive in developing new skills through research, tutorials and practical experimentation.
- Attention to detail: Experienced in website customisation, digital design, product development and maintaining accurate information.
- Organisation and project management: Skilled in managing projects, prioritising responsibilities and meeting deadlines.
- Communication and teamwork: Experienced in customer service, collaborating with colleagues, training employees and working independently.

Employment History

Self-Employed Business Owner | 2020–Present

Established and independently managed e-commerce businesses, developing practical experience in website management, digital technology, creative problem-solving and project development.

- Website development and customisation: Designed, customised and maintained Shopify e-commerce websites, managing layouts, navigation, product listings and digital content to improve functionality and user experience.
- Theme code experimentation: Explored and modified Shopify theme code to troubleshoot issues, customise website features and achieve specific design requirements, developing an interest in how website code works.
- Technical problem-solving: Independently researched technical issues, tested solutions and implemented improvements across websites.
- Project development: Managed digital and physical projects from initial concept through design, implementation, testing, refinement and sales.
- Digital achievements: Built a combined social media audience of over 60,000 followers through content creation, brand development and digital marketing strategies.
- Business management: Managed customer communications, orders, stock, suppliers and competing deadlines, demonstrating organisation, adaptability and attention to detail.

Sales Assistant, Visual Merchandiser & Key Holder

Peacocks | September 2014 – November 2016

- Held key-holder responsibilities, including cash handling and access to management functions.
- Trained and supported new employees, demonstrating communication and teamwork.
- Created visual merchandising displays in line with company branding and presentation standards.
- Managed customer enquiries, stock organisation and daily shop-floor operations.

Additional Employment Experience

Temporary Sales Assistant | H Samuel | November 2013 – January 2014
Waitress, Barista & Cleaner | The Old Stables Café | December 2011 – December 2012 and 2017
Market Stall Assistant | Sweetie Sues | January 2008 – December 2010

Through these roles, I developed strong communication, teamwork, customer service, organisational and problem-solving skills.

Technical Learning and Personal Projects

HTML, CSS & JavaScript | Beginner

I am currently developing foundational knowledge of front-end web development through independent study, online tutorials, research and practical projects.

Shopify Theme Customisation

Gained practical experience exploring and modifying e-commerce theme code to resolve design issues and implement customisations beyond standard theme settings.

Recruiter's To-Do List | HTML, CSS & JavaScript

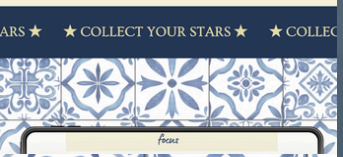

Developed an interactive recruitment themed website as a personal learning project, incorporating dynamic checkboxes, progress tracking and responsive design. Used online tutorials, independent research and AI assistance to develop the project and build my understanding of HTML, CSS and JavaScript.

The following page showcases a collage of products, branding, graphic designs and websites that I have independently designed and developed through my businesses.
